

EXPERIMENT 27. Bar Chart of Programming Language Popularity

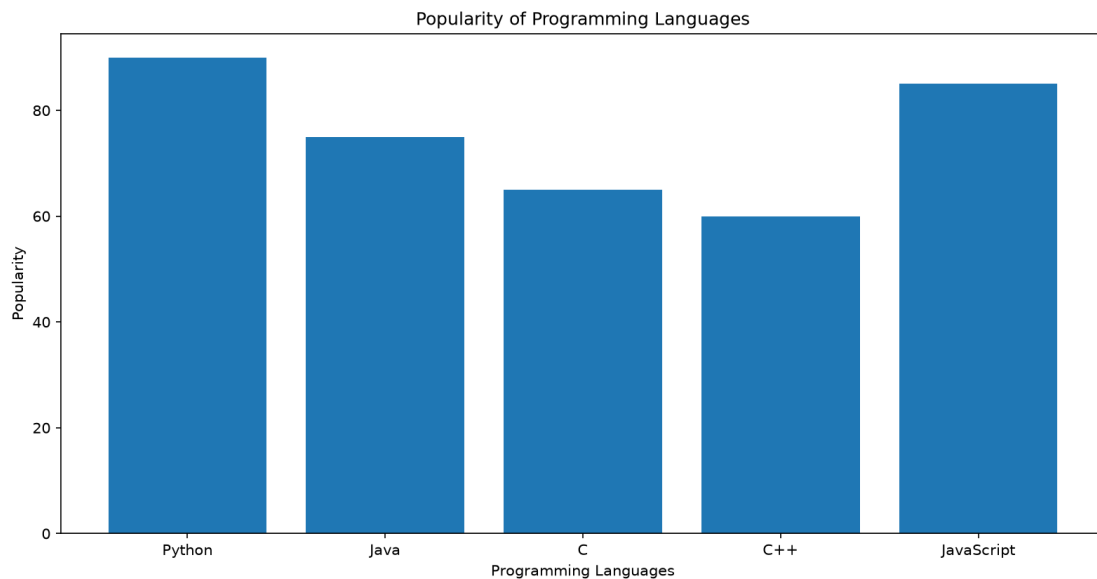

AIM:

To write a Python program to display a bar chart of the popularity of programming languages.

CODE:

```
exp27.py > ...
1 import matplotlib.pyplot as plt
2 languages = ['Python', 'Java', 'C', 'C++', 'JavaScript']
3 popularity = [90, 75, 65, 60, 85]
4 plt.bar(languages, popularity)
5 plt.xlabel("Programming Languages")
6 plt.ylabel("Popularity")
7 plt.title("Popularity of Programming Languages")
8 plt.show()
```

OUTPUT:

RESULT:

Thus, the popularity of programming languages was successfully represented using a bar chart.

EXPERIMENT 28. Horizontal Bar Chart of Programming Languages

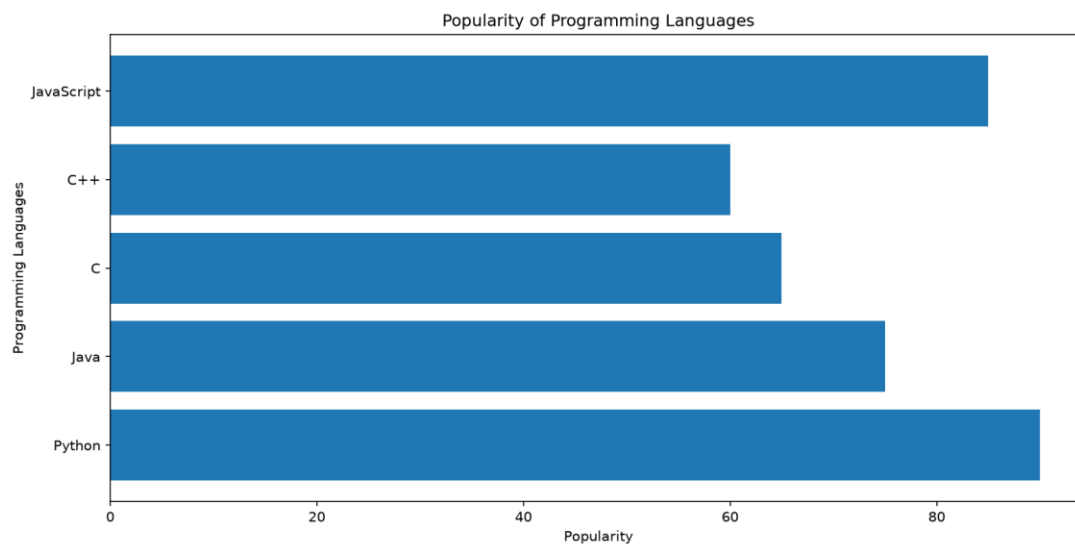

AIM:

To write a Python program to display a horizontal bar chart of the popularity of programming languages.

CODE:

```
exp28.py > ...  
1 import matplotlib.pyplot as plt  
2 languages = ['Python', 'Java', 'C', 'C++', 'JavaScript']  
3 popularity = [90, 75, 65, 60, 85]  
4 plt.barh(languages, popularity)  
5 plt.xlabel("Popularity")  
6 plt.ylabel("Programming Languages")  
7 plt.title("Popularity of Programming Languages")  
8 plt.show()  
n
```

OUTPUT:

RESULT:

Thus, a horizontal bar chart was successfully created.
